The following workshops will be delivered in English only.

ENERGY MANAGEMENT INFORMATION SYSTEMS (EMIS) Thursday March 8, 2012

This full-day workshop shows how implementing an EMIS will lay
the foundation to monitor, document and report on energy
performance. Learn how to:

- Make energy performance visible in your organization to improve its performance and create financial business value
- Develop an EMIS and use our toolkit to create financial business value
- Implement an EMIS to establish the groundwork to comply with the new ISO 50001 Energy Management Systems standard.

ENERGY EFFICIENCY FINANCING Tuesday March 13, 2012

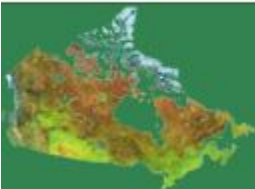

This full-day workshop will help you build an effective finance-based
business case for your energy efficiency project. Learn how to:

- analyze your energy project for net present value, internal rate of return and other financial parameters using an Excel® spreadsheet
- identify energy and non-energy project benefits
- calculate the financial value created by energy efficiency projects
- understand the basics of third-party financing mechanisms such as energy performance contracting.

Take home an Excel® spreadsheet to help analyze energy projects from an internal financing or a third-party financing perspective.
